

I am a stay at home mom that used to be bombarded everyday with dozens of phone calls. My time is important with my children and you cannot screen each call with caller id. Since adding my name to the indiana no call list I receive maybe 1 a week that is now a survey or political "vote for me" call (which I would prefer not to) It was an invasion of my privacy and It would be a disservice to the public to lessen the law. IF anything, the national standard should be raised to give all people of the united states protection from telemarketers. Please leave it alone.
